SOVIET MATHEMATICS — DOKLADY

Volume 39, Number 1 July-August 1989

CONTENTS

Arutyunov, A. V. *On the theory of the maximum principle in optimal control problems with phase constraints* 1

Belov, Yu. A. and Kas'yanyuk, V. S. *On the set of values of a system of linear functionals in terms of the data of another system of linear functionals* ... 5

Verbitskiĭ, V. I., Gorban', A. N., Utyubaev, G. Sh., and Shokin, Yu. I. *The Moore effect in interval spaces* 8

Kachalov, V. I. and Lomov, S. A. *On the analytic properties of solutions of differential equations with singular points* 12

Lëtchikov, A. V. *A limit theorem for a recurrent random walk in a random environment* 15

Liskovets, O. A. *Regularization of optimal control problems on ill-posed variational inequalities* 19

Motylev, L. Yu. *An asymptotic method for ordinary differential equations with a turning point of infinite order* 23

Sonin, I. M. *Separation of jets and a generalization to the nonhomogeneous case of a theorem on decomposition of a finite homogeneous Markov chain into ergodic components* 27

Chikvinidze, L. N. *On the approximation of functions, in domains with a quasiconformal boundary, in weighted plane integral metrics* 32

Yakimavichyus [Jakimavičius], D. A. *On large deviation theorems for dependent random variables* 35

Voevodskiĭ, V. A. and Shabat, G. B. *Equilateral triangulations of Riemann surfaces, and curves over algebraic number fields* 38

Dubinskiĭ, Yu. A. *On the necessity of the Kovalevskaya conditions and their generalizations* 42

Kazimirskiĭ, P. S. and Shchedrik, V. P. *On the solutions of one-sided matrix polynomial equations* 45

Karlovich, Yu. I. *On algebras of singular integral operators with discrete groups of shifts in L_p-spaces* 48

Makin, A. S. *On the mean value formula for eigenfunctions and associated functions of the Schrödinger operator* 54

Nasibov, Sh. M. *On a nonlinear Schrödinger equation with a dissipative term* . 59

Nguen Tkhi Tkh'eu Khoa [Nguyễn Thị Thiêu Hoa], *An oscillation property of the operator $D(D^2 + 1^2)\cdots(D^2 + n^2)$ and applications* 64

Nikol'skiĭ, M. S. *The maximum principle in a nonsmooth minimax problem of optimal control* 69
Polyak, B. T. and Tsybakov, A. B. *Optimal projection estimators for a regression function of unknown smoothness* 73
Sviridyuk, G. A. *Manifolds of solutions of a class of evolution and dynamical equations* 78
Sharafutdinov, V. A. *Radial transformation of symmetric tensor fields* 82
Arsenin, V. Ya., Kriksin, Yu. A., and Timonov, A. A. *On a spectral approach to the construction of local regularization algorithms* 86
Bastis, A. Ĭ. *On the generalized localization principle for the N-fold Fourier integral in L_p-classes* 91
Belykh, V. N. *Algorithms without saturation in the problem of numerical integration* 95
Bogatyreva, N. A. and Pyatnitskiĭ, E. S. *The minimax principle of mechanics and its application to optimal control problems* 99
Bugir, M. K. *Oscillation conditions for equations of the form $L^k u + c(x,u) = f(x)$* 104
Denisov, V. N. *Some questions of the stabilization of means of a solution of the Cauchy problem for hyperbolic equations* 108
Kosmodem'yanskiĭ, Jr., A. A. *The behavior of solutions of the equation $\Delta u = -1$ in convex domains* 112
Panin, V. M. *The normalized method of finite penalties in nonlinear programming problems* 115
Ponomarenko, I. N. *The isomorphism problem for classes of graphs* 119
Rusanov, V. V. and Bezmenov, I. V. *Efficient roundoff methods in executing arithmetic operations on a computer* 123
Abduvaliev, A. O., Rozov, N. Kh., and Sushko, V. G. *Asymptotic representations of solutions of certain singularly perturbed boundary-value problems* 127
Aleksanyan, A. A. *Realization of Boolean functions by disjunctions of products of linear forms* 131
Blatov, I. A. and Strygin, V. V. *The spline-collocation method on adaptive meshes for singularly perturbed boundary value problems* 136
Borichev, A. A. *Convolution equations and the structure of 1- and 2-invariant subspaces in a scale of spaces of rough growth* 140
Varlamov, V. V. *On the Cauchy problem for an equation describing time-dependent waves in a medium with relaxation* 145
Kudryavtsev, D. L. *Asymptotics of solutions of a linear second order differential equation with regular singular points* 149
Petrosyan, A. I. *Peak sets and interpolation sets of algebras of smooth functions on a polydisk and on the future tube* 153
Romanov, A. S. *A capacity analog of Lebesgue's theorem on the differentiability of the integral* 156
Romanov, V. G. *On the solvability of inverse problems for hyperbolic equations in a class of functions analytic in some of the variables* 160

Turaev, D. V. and Shil'nikov, L. P. *On Hamiltonian systems with homoclinic saddle curves* 165
Blokh, A. M. and Lyubich, M. Yu. *Absence of wandering intervals in one-dimensional smooth dynamical systems* 169
Vaksman, L. L. and Korogodskiĭ, L. I. *An algebra of bounded functions on the quantum group of the motions of the plane, and q-analogues of Bessel functions* 173
Vasyunin, V. I. *The spectral multiplicity of contractions with finite deficiency indices* 178
Gel'fand, I. M., Zelevinskiĭ, A. V., and Serganova, V. V. *General hypergeometric functions associated with a pair of homogeneous spaces* 182
Zelikin, M. I. and Borisov, V. F. *Fields of optimal trajectories containing singular second order extremals and extremals with frequent switchings* 188
Zubov, V. I. *A system of differential equations with two regular singular points* 192
Pogorelov, A. V. *Loss of stability of developable shells* 195
Guliev, V. S. *On certain classes of anisotropic integral operators and weighted imbedding theorems in a domain with nonsmooth boundary* 199
Zubov, V. I. *Integral invariants of asymptotically stable systems of differential equations* 204
Ostapenko, V. V. *On the divergence of difference operators defined on a nonuniform difference mesh* 206
Pokornyĭ, Yu. V., Lazarev, K. P., and Gareeva, T. M. *On conditions of V. A. Il'in type for solvability of nonlocal boundary value problems for ordinary differential equations* 210
Trofimov, V. V. *Symplectic connections, Maslov index, and Fomenko's conjecture* 214
Tsaranov, S. V. *Classification of monoids of Coxeter type having attractors* 218
Sharafutdinov, V. A. *Integral geometry of a tensor field along geodesics of a metric close to the Euclidean metric* 221

Volume 39, Number 2 September-October 1989

CONTENTS

Azarin, V. S. and Giner, V. B. *On the completeness of systems of exponentials in convex domains* 225
Almamedov, M. S. *On proper products of multiparameter matrix Sturm-Liouville equations* 229
Bakaev, N. Yu. *Stability theory of additive difference schemes in Banach spaces* 233
Ventsov, Yu. G. *On the algorithmic dimension of models* 237
Zubov, V. I. *The problem of oscillation accumulation in mechanical systems with a finite number of degrees of freedom* 240

Ivchenko, G. I. *Divisible statistics and a class of stopping times for polynomial trials* 243
Kapustin, N. Yu. *A problem for a parabolo-hyperbolic equation with a nonlocal condition for matching normal derivatives on the line of change of type*... 248
Kokilashvili, V. M. *On fractional integrals on curves* 251
Malamud, M. M. *On extensions of Hermitian sectorial operators and dual pairs of contractions* 253
Martynyuk, A. A. *A hierarchical matrix Lyapunov function and stability under structural perturbations* 260
Moiseev, N. G. *On factorization of matrix-valued functions of special form* 264
Chan Dyk Van [Trần Đú'c Vân] and Kha Zuĭ Bang [Hà Duy Bang], *On the solvability of nonlinear differential equations of infinite order in unbounded domains* 268
Almamedov, M. S. *On the structure of the spectrum of selfadjoint multiparameter problems* 273
Vavilov, S. A. *On solvability of a class of boundary value problems* 277
Vinokurov, V. A. and Repnikov, N. F. *Solution of systems of algebraic equations with a random error in the matrix of the system* 279
Morozov, A. S. *Elementary properties of groups of recursive permutations* 282
Nesterenko, N. G. *On algebras representable by triangular matrices* 285
Sapozhenko, A. A. *Asymptotics of the number of monotone functions on partially ordered sets* 289
Turetaev, I. D. *Difference schemes absolutely globally stable in time for the equations of magnetogasdynamics with viscosity* 294
Ul'yanov, P. L. *On classes of infinitely differentiable functions* 298
Abramov, N. N. and Kucherenko, V. V. *An algorithm for numerical solution of the Dirichlet problem* 302
Aliev, R. M. *Application of projection methods to the construction of best quadrature formulas on sets of solutions of boundary value problems* 306
Manturov, O. V. *Invariants of adjoint and coadjoint representations of semidirect Lie algebras* 311
Mikesh, Ĭ. *On the existence of n-dimensional compact Riemannian spaces admitting nontrivial global projective transformations*..... 315
Pobedrya, B. E. and Radzhabov, N. A. *The method of sources for solving a problem of elasticity theory involving stresses* 318
Rakhimov, I. *Asymptotic behavior of families of particles in branching random processes* 322
Shokin, Yu. I., Urusov, A. I., and Yan'shin V. N. *On the analysis of the stability of two-level difference schemes by the method of differential approximation* 326
Yanushauskas [Janušauskas], A. I. *On a class of integrodifferential equations* .. 329
Zubov, V. I. *Vibration effects in linear and nonlinear systems*..... 332
Kanovich, M. I. *On the semantics and logic of computational problems* 334
Sabitov, K. B. *A maximum principle for systems of second-order equations of mixed type*..... 339

Shaposhnikova, T. O. *Applications of multipliers in Sobolev spaces to L_p-coerciveness in the Neumann problem* 344
Zubov, V. I. *Precision approximation of kinematic trajectories* 348
Igoshin, V. A. and Shapiro, Ya. L. *Quasigeodesic mapping and Riemannian gauge structure* 351
Kalanchuk, R. I. *On the structure of a Monge manifold under indeterminacy of its geodesic shortest paths* 355
Kuz′minykh, A. V. *A curve in R^n, homeomorphic to a line, that intersects every unbounded curve of bounded curvature* 358
Prilepko, A. I. and Orlovskiĭ, D. G. *On a semigroup approach to the problem of determining the nonhomogeneous term in evolution equations* 362
Rovenskiĭ, V. Yu. *Decomposition of ruled and parabolic surfaces* 366
Sarymsakov, T. A. and Ganikhodzhaev, N. N. *Analytic methods in the theory of quadratic stochastic operators* 369
Sumin, V. I. *Volterra functional-operator equations in the theory of optimal control of distributed systems* 374
Buslaev, A. P. *Extremal problems of approximation theory, and nonlinear oscillations* 379
Gel′fand, I. M., Zelevinskiĭ, A. V., and Kapranov, M. M. *Projectively dual varieties and hyperdeterminants* 385
Gurvich, V. A. and Shabat, G. B. *Charts of surfaces and their schemes* 390
Ibragimov, I. A. and Khas′minskiĭ, R. Z. *Asymptotic normal families of experiments, and efficient estimates* 395
Lepp, R. È. *Approximation of the problem of stochastic programming with complete recursion* 400
Marenich, V. B. *The structure of open manifolds of nonnegative curvature* 404
Nikolaev, I. G. *Isotropic metric spaces* 408
Roĭtberg, Ya. A. and Sheftel′, Z. G. *On the density of solutions of elliptic problems with localized right sides in function spaces on a manifold* 411

Volume 39, Number 3 November-December 1989

CONTENTS

Aliev, R. M. *Best quadrature formulas for some classes of differentiable functions* 415
Atakhodzhaev, M. A. *On nonuniqueness of the solution of an ill-posed problem for the biharmonic equation* 420
Gomonov, S. A. *On cluster sets of multivalued mappings of topological spaces* . 425
Getsadze, R. D. *On the divergence in measure of general multiple orthogonal Fourier series* 430
Grigor′ev, D. Yu. *Complexity of computing the genus of a system of exterior differential equations* 432

Ivriĭ, V. Ya. *Sharp spectral asymptotics for the two-dimensional Schrödinger operator with a strong magnetic field* 437
Kashchenko, S. A. *On complicated periodic solutions of a system of differential-difference equations with small diffusion* 442
Kolesov, A. Yu., Kolesov, Yu. S., Mishchenko, E. F., and Rozov, N. Kh. *A mixing attractor in relaxation systems* 446
Rasulov, K. M. *On the solution of boundary value problems of Riemann type for polyanalytic functions in the case of multiply connected domains* 449
Rustamov, Kh. P. *On differentiability-smoothness properties of functions in the space* $W^l H^{\omega}_{p,r}(S^n)$ *on the sphere* 455
Yushmanov, S. V. *A general method of estimating metric characteristics of a graph that are associated with the eccentricity* 460
Aleksandrov, A. B. *Orthogonal bases of inner functions* 463
Vaksman, L. L. *q-analogues of Clebsch-Gordan coefficients, and the algebra of functions on the quantum group* SU(2) 467
Kaliev, I. A. and Razinkov, E. N. *On a Stefan problem with phase relaxation* . 471
Lyashko, S. I. and Man′kovskiĭ, A. A. *Controllability of parabolic systems with impulsive action* 476
Matveev, O. V. *On a method for solving polynomial equations in Banach spaces* 480
Nagaev, S. V. *Ergodic theorems for homogeneous Markov chains* 483
Romanovskiĭ, R. K. *Averaging hyperbolic equations* 487
Rystsov, I. K. *A lower bound for the time to add two numbers* 491
Trigub, R. M. *Multipliers of Fourier series and approximation of functions by polynomials in the spaces C and L* 494
Shlyk, V. A. *The method of conjugate families in the theory of moduli* 499
Aleksandrov, I. A. *Estimates of the coefficients of bounded univalent functions with rotational symmetry* 503
Alekseev, V. A. and Nikulin, V. V. *Classification of del Pezzo surfaces with log-terminal singularities of index* ≤ 2, *and involutions on* $K3$ *surfaces* 507
Zuev, Yu. A. *Asymptotics of the logarithm of the number of threshold functions of the algebra of logic* 512
Ivanov, V. K. and Mel′nikova, I. V. *Construction of quasivalues for weakly well-posed problems* 514
Konyukhova, N. B. *On the existence of stable initial manifolds for systems of nonlinear functional-differential equations* 519
Mamedov, Yu. A. *On spectral problems for a system of ordinary differential equations that is not normal* 524
Pazhitnov, A. V. *On the sharpness of the inequalities of Novikov type in the case* $\pi_1(M) = \mathbf{Z}^m$ *for Morse forms whose cohomology classes are in general position* 528
Ryabko, B. Ya. *A fast sequential code* 533
Skriganov, M. M. *On lattices in algebraic number fields* 538
Davydov, O. V. *Asymptotic behavior of best approximations of individual functions in the classes* $W^r H_{\omega}$ *in the* L_p*-metric* 541

Dektyarev, I. M. *Curves of finite order and divisors with maximum defect value* 545
Kabanikhin, S. I. *Regularization of Volterra operator equations of the first kind with boundedly Lipschitz-continuous kernel* 549
Palyutin, E. A. *Spectra of varieties* 553
Starkov, A. V. *On optimal vector algorithms of the Monte Carlo method* 555
Yarmukhamedov, Sh. *An analogue of the Riemann-Volterra formula for harmonic functions of several variables* 560
Vorozhtsov, E. V. and Mazurik, S. I. *Analysis of the stability of finite-difference schemes using symbolic computations and optimization methods* 564
Korchagin, A. B. *New M-curves of degrees* 8 *and* 9 569
Kubyshkin, E. P. *The method of infinite-dimensional normalization in the study of selfoscillatory solutions of a class of singularly perturbed boundary value problems* 573
Litvinchev, I. S. *An iterative decomposition in dynamical problems with cross couplings* 578
Rodionov, E. D. *The geometry of homogeneous Riemannian manifolds* 581
Slobodin, V. I. *Homogeneous boundary value problems for the polyharmonic operator with boundary conditions on thin sets* 584
Fedotov, A. M. and Lepshokov, S. I. *A minimax regularizing algorithm for solving an equation of convolution type* 588
Chernousov, V. I. *On the Hasse principle for groups of type* E_8 592
Chistov, A. L. *The complexity of constructing the ring of integers of a global field* 597
Anikonov, Yu. E. and Belov, Yu. Ya. *On unique solvability of an inverse problem for a parabolic equation* 601
Vlasov, V. I. and Volkov, D. B. *Solution of the Dirichlet problem for the Poisson equation in a domain bounded by a polygon with a rounded corner* 606
Kolesov, A. Yu. *Relaxation parabolic systems* 610
Orël, E. N. *A method for solving optimal control problems* 614
Rapinchuk, A. S. *On the congruence problem for algebraic groups* 618
Shlyk, V. A. *K-capacity and some of its applications in the theory of mappings with bounded distortion* 622
